Bega Cheese Limited has a long and uniquely Australian history that all started with humble beginnings in dairy.

The Bega Factory began production in 1900 as demand grew for the rich, creamy products made in the traditional way. Bega has been a dominant brand in the Australian market for over 40 years in both processed and natural cheddar cheese products.

Bega made product regularly sells at the rate of over 1 million packs of cheese per day across a variety of brands and customers. This includes “Bega” branded cheese which is cheese manufactured by Bega and sold under the “beqa” brand by Fonterra Brands (Australia).

In July 2017, Bega expanded its portfolio to include Vegemite, ZoOSh and Bega Peanut Butter. Bega now operates manufacturing sites across Victoria and NSW producing some of Australia’s most iconic and loved food brands and products.

The Bega name stands for quality and integrity and is synonymous with Australian values. Bega branded products are the first choice of many Australians as they stroll down the supermarket aisle.

From the heart of northern Germany

If you think about the landscape of Germany, maybe you'll think about the Bavarian Alps. But there is much more than this. A land of lush, sweeping green pastures, these are the characteristics of northern Germany. The authentic natural environment, around the idyllic city of Oldenburg, makes a huge contribution to the outstanding quality of Oldenburger products.

Most of the milk used for Oldenburger products comes from farms in northern Germany. Many of them have been family-operated for decades, with experience being handed down from generation to generation. The dairy farmers belong to a regional collective with more than 9,800 members.
